Thanks, Andy. That's correct. We're sharing this with you for information purposes; it's not associated with the proposed boundary options analysis.

Yes... I'm interested in seeing it. I'll not include this as an official part of the recent boundary recommendation then.

Hi Andy. When I spoke with you on the phone yesterday, you mentioned you'd be interested in seeing the modeling done to support the siting of the Labadie SO2 monitors. That's what this latest dataset is. It is separate and distinct from the modeling done in support of the boundary recommendation options. Does that clear it up? Hope I haven't introduced more confusion in all of this!

Ashley,

Is this in support of the SO2 boundary recommendations or the network plan? I guess I don't recall ever actually asking for this modeling. Wendy and I did recently discuss whether I had this modeling, and I may have asked for it during that discussion with her, but I don't actually recall doing so. I will download it but for the record I need to understand if this modeling MDNR is providing is an official part of the recent Labadie boundary recommendations so I can include it with that review package. I'll let you know when I have it downloaded.

Thanks,

Andy

Hi Andy,

Sorry for the confusion. The modeling files we are sharing today include all modeling and analysis done for the monitor siting at Labadie, that was performed in 2012.

The file you downloaded earlier this week was the complete set of modeling files for the CD round.

Thanks,

Ashley

Now I'm confused. The zip file I've already downloaded did not have all the modeling? The file was "All-CD-Model-Files.zip" and seems to have modeling for the 3 EGU's, 45 MB in size. So there is more?

Andy,

The modeling files you requested are on the Missouri FTP site now, but we are unable to load them in a single zip file as it's over our 100mb quota. The first zip file is named "Misc Items.zip" and is in "Distribution/DNR/DEQ/Air Pollution Control/Planning".

Let me know once you've retrieved this zip file, and I'll delete it and add the second zip file.
